Welcome to the Future According to Windows 95

By Alan Zerman

world the latest shaper in the Windows aga.—Woodsey 55 Originally summanced for Fall 94, then 'bufore the end of the year', then Spring 95, life fimally gone to menufacturally a write thes, in order for millions of capses to be ranky as stores for the afficial reference date, Au-

The Microsoft steam

roller is on track to

With Microsoft budgeting \$84 million (US), you can be rate that the release will be noficed—and that will be a tred-

uet that will change the free of compaint for the rest of the dende. It won't be as big a change as the new free changes mende OOS to propheal enack Windows 2, which kept the compaint world husy for the first half of the

Estimates vary between 20 milli no sand TE million species sold by this time early serimilli have to save and see how many of the current Windows such with the save of contract Windows such will rush to uppract to support the same or proposets series, in particular, will wait a while—they were also since the gat on to the Windows 3 bandwagos), but Windows 95 will come pre-installate or 80% to gat not to the Windows 3 bandwagos), but will be some of the same will be a some of the part. And new compatity particulars are post. And new compatity particulars the post that they compatity particular the beneare market or own above much band-

In one you've been release or otherwise mosed the growing pro-release bype for the product over the past year, here's who Murrosoft is premaing.

Windows 95 is first and forement, comneathle with almost all position DOS and Windown 3 software and hardware, in many ways, this has kept if no evolutionary product, rother than a revolutionary use. But that the potential market it much larger than for produces such as OSC, Windows NT, or the Macantoni that force users to make a mane drouge thank with the name.

However, Windows 95 will accelerate some trends in hardware sales...

Smart developers should take their time and re-think their applications to take advantage of Win95's multithreading capabilities.

Hawever, Windows 95 will receive us some boads in hardware sales. for stolenor, reyone advertising a computer with 4 mags of RAM Summalised a discrition of tray and Windows \$5, but purely. The setty-level compater will great once with a feature level of the setty-level compater will great purposes and the setty-level resolutes Luckily hard deep purpose by push up the sour of that enty-level resolutes Luckily hard deep pulson have beaus in Manifest Set the pulson have beaus in Manifest \$50 feth pulson yet of this expense will be the new generation of Windows above.

will be doing their customers (and

One of the bug features of the new operating system at Plag and Play. Wholewo \$5 does a better than expected job of coping with the eress of sees compatible cauds and hardware add-era available for PCs, but ney new

Look for PnP motherboards, professibly with upgradable flash-RAM BNOses, and for everything from proders to modens to sound and video and CD-ROM's to ... well, everything to support this new standard. PC Cards will get a bug boost for portable

use, and maybe make a yamp to deskrops. Look for enhanced plentilet ports becoming more common, so well as more use of virticial, influend communication between computers, and between computers and paraties.

Does though Warth's document pend gold in supporting DOS gartes, making the unknown bowled and accessions; in the inchestable Will off—a pregression genisorement that is being passe or make the pend of the control of Wildren as they would under DOS Add or Wildren as they would under DOS Add or Wildren as they would under DOS Add or Wildren by which is support for more of PAM, and so more road to write sound or SYM, devision the set of the DOS game is for approaching and with a, the cold for DOS games for Add with a, the cold for DOS games (as

More and more so-called Suites, piling collections of abblications together and demanding more and more

drive space. De dur Windows end of morrors developmost, though, the race will be on-to uperade bit age hostens will res ass fine under the new

Smart developers should take their time and

of Win92's reals-threadury espelvistics ran projections of applications tagether and Draw 6 for Win 93, by no means the bispest.

On the other hand, small correspons will acts that ranks use of Win95's more extenseve use of OUEs to except to applications. A record good manage is VISIO, which adds

Small companies will prosper making small,

carefully crafted products that make use of Win 95's more extensive use of OLE to integrate attitications.

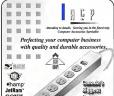

business graphics right ento the toolber Closical Character Recognition into one of

namments like Visual Basic will do well. Windows 95 will give a boast to effici best in TCPSP will be sun one more frefor in the ongoing frequent explosion. Excards and motherbeards, cornitian conouter video to excess from those today. postage-good windows - and that may

time person-to-person communication. The pest year or so has been somewhat (and waited and waited) for Mank's reshould for a new burst of enemy, sad a new government of opportunity for hardware and software development and sales.

Still reney extent Windows \$5 to be a transplant endert, while it looks forward to a multimedia, connected future, it is still looking beckward for old DOS and Windown comparishing. Macrasoft is barely down 92 america and Plus and Plan to Windaws NT And in a gouple of years, when RAM multi-ese hard drives, as £250 MHz. processors (say 1997 or 98), prosumphly wy'll all be ready for the next generation operating system to take us into the begin-

time of the new sentions.
